

CHICOPEE®

Microfibre Plus

Hygienic 100% microfibre wipe

Chicopee® True Confidence™

The unique construction of Microfibre Plus provides excellent streak free cleaning and is perfect for use on glass, stainless steel, mirrors and touchscreens. Additional benefits include its antibacterial activity to reduce cloth odour and its voluntarily obtained FCC certification allowing it to be intentionally used in contact with foods. It is the first microfibre wipe to achieve these two certificates.

Microfibre Plus

FCC | Antibacterial | Machine Washable | Removes 99.99% Bacteria

The machine washable 100% microfibre wipe

Problems

- Traditional microfibre cloths are heavy and bulky, making it difficult to clean tight spaces
- Traditional cloths can stay damp for long periods, creating the perfect breeding ground for bacteria, which causes odour and cross contamination risk
- Keeping modern surfaces free of fingerprints and marks can be highly time consuming

Solutions

- Microfibre Plus is manufactured from 100% microfibre but is much lighter and more supple than traditional cloths, making it great for everyday cleaning
- The unique structure of Microfibre Plus ensures it is quick drying, this combined with the additional antibacterial activity in the cloth dramatically reduces bacterial growth on the cloth
- Microfibre Plus quickly and effectively removes marks from stainless steel, glass, mirrors and touchscreens

Microfibre Plus is the only wipe on the market that has FCC, antibacterial properties & removes 99.99% bacteria from the surface. All Chicopee Europe Foodservice products carry a voluntarily obtained FCC certificate, and can be intentionally used in contact with foods.
